## Objective Career Objective

Self-taught Front-End Developer and Data Analyst with practical experience building responsive web applications and performing data analysis using tools like JavaScript, React.js, Python, and SQL. Committed to continuous learning and innovation. Seeking remote junior developer or data analyst roles to apply my skills and grow professionally.

## Technical Skills Technical Skills

- Languages: JavaScript, Python, SQL
- Frontend Development: HTML5, CSS3, React.js
- Database & Data Analysis: MySQL, Advanced Excel, Pandas
- Version Control: Git, GitHub
- Tools & Platforms: VS Code, Netlify, LabelMe, Postman
- Soft Skills: Problem-solving, Communication, Adaptability, Team Collaboration

## Projects Projects

### 1. Data Annotation (Computer Vision)

Used LabelMe and Python to annotate and prepare image datasets for machine learning models. Focused on object detection, segmentation, and classification.

Tech Used: LabelMe, Python

### 2. Budget Tracker Web App (sample project)

Built a simple budget tracker allowing users to record income and expenses.

Tech Used: HTML, CSS, JavaScript, React.js

GitHub: [To be added]

### 3. Data Cleaner Script (sample project)

Developed a Python script to clean and preprocess raw CSV files, summarize key metrics, and export clean data.

Tech Used: Python, Pandas

## Education Education

ANSAR-UD-DEEN High School, Surulere, Lagos - 2008-2014

Mabchris Holyland School, Surulere, Lagos - 2002-2008
